

The Weigelt Corporation has three branch plants with excess production capacity. Fortunately, the corporation has a new product ready to begin production, and all three plants have this capability, so some of the excess capacity can be used in this way. This product can be made in three sizes--large, medium, and small--that yield a net unit profit of \$420, \$360, and \$300, respectively. Plants 1, 2, and 3 have the excess capacity to produce 750, 900, and 450 units per day of this product, respectively, regardless of the size or combination of sizes involved.

The amount of available in-process storage space also imposes a limitation on the production rates of the new product. Plants 1, 2, and 3 have 13,000, 12,000, and 5,000 square feet, respectively, of in-process storage space available for a day's production of this product. Each unit of the large, medium, and small sizes produced per day requires 20, 15, and 12 square feet, respectively.

Sales forecasts indicate that if available, 900, 1,200, and 750 units of the large, medium, and small sizes, respectively, would be sold per day.

At each plant, some employees will need to be laid off unless most of the plant's excess production capacity can be used to produce the new product. To avoid layoffs if possible, management has decided that the plants should use the same percentage of their excess capacity to produce the new product.

Management wishes to know how much of each of the sizes should be produced by each of the plants to maximize profit.

1. Solve the problem using lpsolve, or any other equivalent library in R.
2. Identify the shadow prices, dual solution, and reduced costs
3. Further, identify the sensitivity of the above prices and costs. That is, specify the range of shadow prices and reduced cost within which the optimal solution will not change.
4. Formulate the dual of the above problem and solve it. Does the solution agree with what you observed for the primal problem?

**Answer:**

**1. See code saved with file name WP\_03**

**2. Identify the shadow prices, dual solution, and reduced costs**

Shadow prices:

0.00 0.00 0.00 12.00 20.00 60.00 0.00 0.00 0.00 -0.08 0.56

Dual solution:

0.00 0.00 0.00 12.00 20.00 60.00 0.00 0.00 0.00 -0.08 0.56

Reduced cost:

0 0 -24 -40 0 0 -360 -120 0

4.

$x_1$  = number of large units produced per day at Plant 1,  
 $x_2$  = number of medium units produced per day at Plant 1,  
 $x_3$  = number of small units produced per day at Plant 1,  
 $x_4$  = number of large units produced per day at Plant 2,  
 $x_5$  = number of medium units produced per day at Plant 2,  
 $x_6$  = number of small units produced per day at Plant 2,  
 $x_7$  = number of large units produced per day at Plant 3,  
 $x_8$  = number of medium units produced per day at Plant 3,  
 $x_9$  = number of small units produced per day at Plant 3.

Objective function:

Maximize  $420 x_1 + 360 x_2 + 300 x_3 + 420 x_4 + 360 x_5 + 300 x_6$   
 $+ 420 x_7 + 360 x_8 + 300 x_9,$

Subject to:

(Capacity)

$$\begin{aligned}
 x_1 + x_2 + x_3 &\leq 750 \Rightarrow y_1 \\
 x_4 + x_5 + x_6 &\leq 900 \Rightarrow y_2 \\
 x_7 + x_8 + x_9 &\leq 450 \Rightarrow y_3
 \end{aligned}$$

(Square footage)

$$\begin{aligned}
 20 x_1 + 15 x_2 + 12 x_3 &\leq 13000 \Rightarrow y_4 \\
 20 x_4 + 15 x_5 + 12 x_6 &\leq 12000 \Rightarrow y_5 \\
 20 x_7 + 15 x_8 + 12 x_9 &\leq 5000 \Rightarrow y_6
 \end{aligned}$$

(Sales)

$$\begin{aligned}
 x_1 + x_4 + x_7 &\leq 900 \Rightarrow y_7 \\
 x_2 + x_5 + x_8 &\leq 1200 \Rightarrow y_8
 \end{aligned}$$

$$\begin{aligned}
 & \quad \quad \quad x_3 + \quad \quad \quad x_6 + \quad \quad \quad x_9 \leq 750 \Rightarrow y_9 \\
 \text{(Same percentage of capacity)} \\
 & 900 x_1 + 900 x_2 + 900 x_3 - 750 x_4 - 750 x_5 - 750 x_6 = 0 \Rightarrow y_{10} \\
 & 450 x_1 + 450 x_2 + 450 x_3 - 750 x_7 - 750 x_8 - 750 x_9 = 0 \Rightarrow y_{11}
 \end{aligned}$$

$$Z = 750 y_1 + 900 y_2 + 450 y_3 + 13000 y_4 + 12000 y_5 + 5000 y_6 + 900 y_7 + 1200 y_8 + 750 y_9$$

$$y_1 + 20 y_4 + y_7 + 900 y_{10} + 450 y_{11} \geq 420$$

$$y_1 + 15 y_4 + y_8 + 900 y_{10} + 450 y_{11} \geq 360$$

$$y_1 + 12 y_4 + y_9 + 900 y_{10} + 450 y_{11} \geq 300$$

$$y_2 + 20 y_5 + y_7 - 750 y_{10} \geq 420$$

$$y_2 + 15 y_5 + y_8 - 750 y_{10} \geq 360$$

$$y_2 + 12 y_5 + y_9 - 750 y_{10} \geq 300$$

$$y_3 + 20 y_6 + y_7 - 750 y_{11} \geq 420$$

$$y_3 + 15 y_6 + y_8 - 750 y_{11} \geq 360$$

$$y_3 + 12 y_6 + y_9 - 750 y_{11} \geq 300$$

$$y_1, y_2, y_3, y_4, y_5, y_6, y_7, y_8, y_9, y_{10}, y_{11} \geq 0$$

After solving this dual by lpsolve solution agrees with primal problem (codes in

**WP Dual 03**)
